CHALK ONE UP TO FRIGO DESIGN . . . Turn Your Refrigerator into a Chalkboard & Message Center

Brewerton, NY - Create an 'interactive' refrigerator with Frigo Design's magnetic chalkboard surface. Now there's a creative and fun way to keep family members posted about each other's events, important phone calls or other information. Frigo Design, the country's leading manufacturer of **Frame and Panel Sets for household**

appliances, introduces the unique Chalkboard Set for the refrigerator.

The Chalkboard Frame and Panel Set easily attaches to any make or model of refrigerator – all the way back to 1942 – transforming a plain refrigerator into a unique message center. It is available in a choice of schoolhouse green or black and comes complete with chalk tray and a box of colored chalk. The Chalkboard Frame and Panel Set becomes the center for activity schedules while still allowing families to attach notes and artwork using magnets.

"Families today are busier than ever," says Alan Isaacs, Frigo Design's Vice President of Marketing. "We've all missed important phone calls or forgot to be at one of the kid's games. The refrigerator is the one thing that every member of the family looks at several times each day – it's **the natural choice for communication.**"

Frigo Design **manufactures Frame and Panel Sets** for all makes and models of refrigerators, dishwashers and compactors, and has developed a unique manufacturing process to make **custom-formed panels that easily fit** over the front, sides and even the top of appliances.

Consumers can customize appliances in **virtually any color, finish or material in just minutes.** Custom finish materials include stainless steel, copper, laminates, woods, and virtually any other material that can be made to fit within the frame.

Installation of Frigo Design Frame and Panel Sets is easy and affordable, allowing consumers to customize and update the look of their appliances as often as they like. Professional installation and service is also available.
