# FRIGO DESIGN HAS TURNED UP THE HEAT WITH THEIR EXCLUSIVE SEARED PATINA COPPER TILES!

## Collection of Real Metal Wall & Floor Tiles Continues to Expand for Creating Distinctive Décors

Brewerton, N.Y – Maintaining its reputation for home decorating innovation, Frigo Design has just added **Seared Patina Copper Tiles** to its impressive collection of real metal wall and floor tiles.

"At the 2005 Kitchen and Bath International Show (KBIS) in Las Vegas, we introduced our **Hand Woven Seared Patina Copper Backsplash** to rave reviews," said Alan Isaacs, Vice President of Marketing and Sales for Frigo Design. "Because of the overwhelming response to that product, we decided to enhance our real metal tile selection with the incomparable seared patina copper tile."

Frigo Design utilizes a unique high-heat/burn process on the real copper tiles to create this one-of-a-kind, strikingly beautiful look. The controlled seared/burn technique is hand applied and alters the finish of the copper, producing random colors, light and dark hues, and "rainbow-like" iridescent effects. "This is really an eye-catching look that can be easily integrated into a wide variety of kitchen designs... from a rich, "aged" traditional setting to a sophisticated urban decor."

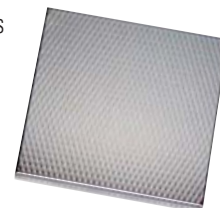

Like all other Frigo Design tiles, the seared patina copper tiles are mounted on a 1/4" water resistant, non-combustible fiber-cemented backer/filler. They bond securely to any surface with mastic or latex thinset, and are designed for a grouted or non-grouted installation. Not only are the tiles available individually, but they can be obtained pre-mounted and grouted for easy-to-install wall and floor applications, custom designed cook top splashes and wall splashes..

### Check Out the Entire Frigo Design Metal Wall and Floor Tile Collection

• **Turned-Edge Metal Tiles** will create a bold new look. Constructed from real metals such as stainless steel, copper and brass, the tiles are available in a broad array of customized patterns and finishes, including woven, hammered and striped. In addition to their appealing appearance, these turned-edge tiles are extremely durable. Tiles are available in 2", 4", 6" and 12" squares. Custom "fill" pieces are available in virtually any size to conform to any wall or floor plan.

• **Radius-Edge Metal Tiles** are manufactured with a seamless corners and "soft" radius edges in 2", 4" and 6" squares, and constructed from real stainless steel, copper and brass. A wide variety of embossed patterns are available. This distinctive design, an exclusive from Frigo, will create a softer, blended appearance that is sure to lend an unmatched beauty to any wall surface in the kitchen or bath, as well as other areas of the home.

• **Subway Tiles** are sleek rectangular tiles that can create a strikingly contemporary look or a rich traditional aura when installed in a brick-like, staggered pattern. These unique tiles are constructed from real stainless steel, copper and brass, come in a broad variety of finishes and textured patterns.

• **The Metallic Finishes Tile Collection** offers an array of awe-inspiring colors. Through a special process, Frigo has replicated a variety of textured appearances from stone, such as granite, to antique metals

like oil-rubbed bronze. Choose from 20 distinctive choices such as antique copper, indigo blue, pewter and carbon. Created by an exclusive heat-based process, the metallic colors and finishes are adhered to a custom metal base.
